

SYNTHETIC PSYCHIATRIC MEDICAL RECORD

DEMO DATA — NOT A REAL PATIENT OR REAL PRESCRIPTION

Patient	Patient B
Date of Evaluation	15 March 2009
Age	32 years
Document Type	Psychiatric Evaluation / Treatment Record

Presenting Concerns

Patient reports persistent auditory hallucinations, persecutory beliefs, social withdrawal, and difficulty maintaining normal social and occupational functioning.

Clinical Assessment

Mental status examination documents guarded behavior, suspicious thought content, auditory perceptual disturbances, and impaired social functioning.

Diagnosis

Diagnosis	Paranoid Schizophrenia
Diagnostic Framework	DSM-IV-TR
Year of Diagnosis	2009

Treatment Plan

Antipsychotic medication was prescribed. Regular psychiatric follow-up and monitoring of symptoms and treatment response were recommended.

Follow-up Note

The diagnosis of Paranoid Schizophrenia continues to appear in subsequent historical records. No recent diagnostic re-evaluation under a newer diagnostic framework is documented in this synthetic record.

For demonstration purposes only: This document is fictional and must not be used for medical treatment, diagnosis, prescribing, or any real clinical decision.
